Dear Caryn,

3/24/83

Sorry the connection was so poor when you phoned.

Thanks for your letter and the xerox of the beginning of CE 1974.

The Byzantine FBI made its own tapes of the discs and belts of the recorded police radio transmissions. I enclose a record reflecting this. Please return it when you've no further need for it.

Suggest that you make an independent check where you can of anything you may use from the Golz Gallery pieces.

You have nothing to worry about, even though some of the Dallas people are paranoid. They may not have answered you because that is their bad and anti-social habit. I'm used to it. They are that way, so don't read more into it. If you haven't tried Penn Jones, ask him.

I also enclose an article on the FBI from the Washington Post. You may not have been aware of this aspect. Would yous please give it to Wrone after you've read it? Thanks.

And good luck!
